Application/Control Number: 10/073,967

Art Unit: 2871

Remarks

1. Claims 1-4 and 14 have been elected with traverse. Nonelected claims 10-13 have been withdrawn from consideration, it is believed these claims are patentably distinct from claims 1-4 and 14, as shown in the previous election/restriction requirement.

Election/Restrictions

This is a further election/restriction requirement of elected claims 1-4 and 14. A further election is respectfully requested.

- 2. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-3, drawn to particular and distinct details/relationships of the anisotropic conductive film(s) and the terminals, classified in class 349, subclass 151.
 - II. Claim 4, drawn to particular and distinct details of the anisotropic conductive film formed separately for at least each one of the film carrier, classified in class 349, subclass 150.
 - II. Claim 14, drawn to particular and details of the terminals of the PCB and the film carrier disposed in rows, classified in class 349, subclass 152.

The inventions are distinct, each from the other because of the following reasons:

Inventions II and I are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention II has separate utility such as it can be used in other devices such as welding devices, OLED devices. See MPEP § 806.05(d).

Application/Control Number: 10/073,967

Art Unit: 2871

Inventions III and I are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention III has separate utility such as it can be used in other devices such as welding devices, OLED devices. See MPEP § 806.05(d).

Inventions, III and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention II has separate utility such as it can be used in other devices such as electropheretic devices, plasma devices. See MPEP § 806.05(d).

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group III, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and the search required for Group II is not required for Group III, restriction for examination purposes as indicated is proper.

Application/Control Number: 10/073,967

Art Unit: 2871

4. A telephone call was made to Mr. Melvin Kraus on 09/28/04 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Contact Information

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Toan Ton whose telephone number is (571) 272-2303.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
